

Faucet Water Filter Introduction

Faucet Water Filter

Faucet filtration system provides healthy, clean, great-tasting water straight from your faucet

- Besides reduces sediment, rust and sand ,Carbon Fiber filter is designed to remove **96% Chlorine (taste and odor)** from water.
- Quick switch from filtered water to tap water.
- 5-Stage water filtration system.
- Faucet filter and cartridge are easy-to-install
- Conveniently provides up to **317 gallons** (or approximately 6 to 9 months
- Fast **Flow Water (2L/min)** purification allows you to fill large capacity containers for your daily uses.

5 Stage Water Purification System

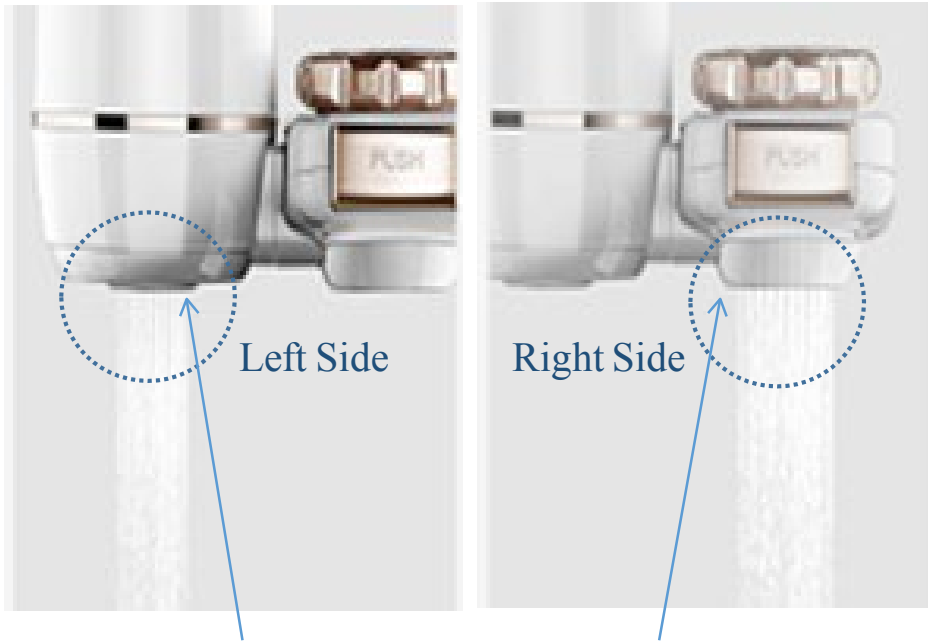

5-Stage water purification system, reduces sediment, rust, sand , Chlorine and improves the taste of water.

Construction Details:

- 1 High quality 304 stainless steel net
- 2 Poly Propylene Filter reduces sand, silt, scale, and rust particles
- 3 Carbon Fiber Filter increases contaminate absorption rates 10-15 times greater than that of granular activated carbon filters
- 4 Poly Propylene Filter reduces sand, silt, scale, and rust particles
- 5 304 stainless steel net

Features

By the press of a button, easily switch from filtered water to tap water

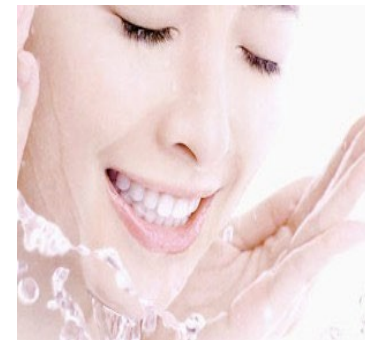

Tap water
From **right** side

Filtered water
From **left** side

Filtered water
for cooking

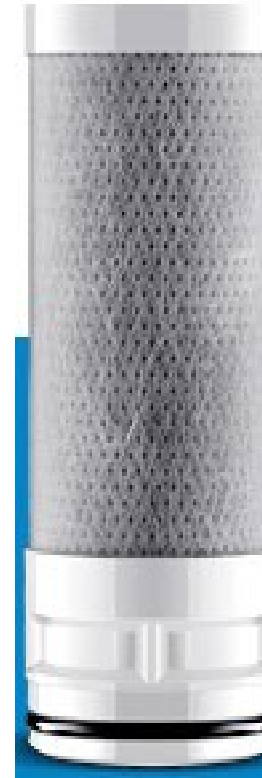

Filtered water
for washing
vegetables

Filtered water
for cleaning your face of air-
borne impurities

Carbon Fiber Filter

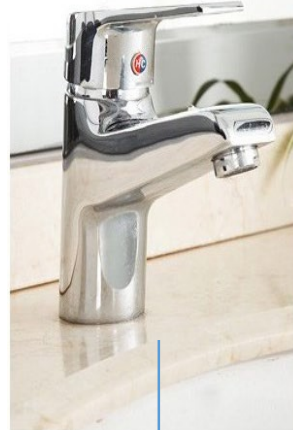

Carbon Fiber Filter increases contaminate absorption rates 10-15 times greater than that of granular activated carbon filters leaving clean, healthy water.

Faucet Installation

Fast Flow Water purification allows you to fill large capacity containers for your daily uses.

Compatible with standard faucets, cannot be used with hand-held or pull-down faucets

Specification

Model	specification
MC122-2	<ol style="list-style-type: none">1. Filter material : Carbon fiber made in Japan.2. Flowrate : 2.0L/min3. Applicable Feed Water : Municipal Water4. Applicable Water Pressure : 0.1-0.4MPa5.
